

# A HEARING LOOP SYSTEM HAS BEEN ADDED TO OUR SOUND SYSTEM

Hearing aid wearers can hear the service directly into your hearing aid, simply by switching the hearing aid to the telecoil (T) setting and adjusting the volume as needed.

If you do not have a hearing aid or do not have telecoil technology in your hearing aid, you may borrow a portable receiver and headset from one of the attendants for the service. Please return after the service.

For those with hearing aids and are unsure about activating the “telecoil”, please ask one of our attendants for a document that you can take with you, so your hearing aid provider can set it up.

Shopping for a hearing aid? Be sure to buy a device with a vertically oriented telecoil with a manual setting for its “telecoil” so that you can use it in this church and various other locations that display the symbol above.
